To whom it may concern

This letter confirms that LINE was contracted for the new Beko Russia HQ offices design and built project. We are deeply grateful to Arseni Goryaev, LINE Managing Partner personally and his team for high quality work performance on all project stages. LINE performed as Architect, General Designer, General Contractor, Project Manager and the Furniture Producer. I would like to point that all works matched our design aspirations, met the budget limitations and pretty tough project timing.

We leased the new office in O1 Properties Class A Stanislavsky Business Center. The space was not in shell and core condition (after the previous tenant move-out). LINE was appointed in the late December, just before Christmas and by the first working day in January all design works were already completed and the LINE General Contractor division mobilized on site for the demolition works. Our projected move deadline was scheduled on the 1st of April and LINE team has finished all works successfully and within needed time on the high-quality professional level.

I would like to thank all LINE team members for their attentive and client-oriented approach. No additional works were requested and stayed within the excellent price/ quality/ design ratio.

Finally, I would certainly recommend LINE design and build team for projects of any complexity level as a team of high professionals in all project aspects: design, management and construction.

Yours Sincerely,

Orhan Sayman

General Manager
